Professional Summary

Senior Product Designer passionate about creating meaningful, user-centered experiences that align business goals with technical feasibility (design for development).
I bring extensive experience in leading and empowering design teams, streamlining processes, and driving excellence in product design, design systems, UX and accessibility. My approach consistently enhances delivery quality, boosts productivity, and minimizes design errors, ensuring agile and high-value outcomes. I'm seeking new opportunities where I can leverage my experience to make an impact and continue growing professionally.
